

MOGAMI's Gold Instrument Silent Series Cable

MOGAMI Cable has announced the Gold Instrument Silent Series Cable. The cable will be offered with either straight or 90° angle Neutrik Silent Plugs. The Neutrik Silent Plug allows hot-swapping guitars without the earsplitting pop or risk of blown speakers. Previously, the silent plugs were available only on Mogami Platinum level instrument cables. Now, Gold Instrument Cable users can enjoy the convenience of "silent swapping" on stage or in studio. The Neutrik Silent Plugs have an internal switch that automatically silences the cable until it is connected. Combined with MOGAMI's signature noise-free cable, Silent Plugs ensure that the only sound coming from the cables is made by the instruments.
